

## **HCBS RULE 1 PERSONAL SERVICES IN THE COMMUNITY**

Policies indicating individual's choice to receive personal services in the community.

This care home provides many personal services and support for our residents. We understand that our residents might choose a generic community resource to provide some personal services. This includes:

- Community based recreational activities.
- Community based clubs.
- Community based educational opportunities.
- Supporting independence by reducing reliance on paid services.

This care home supports our residents' choice in participating in generic community personal services.

Per program designs **Facility Schedule Section C Activities**

"The facility provides at least one social and/or recreational individual or group activity outside the facility each week for each consumer, unless there is a documented limitation on such activity for an individual by their physician." It is possible that each resident will opt for an individual activity each week. This is supported by Rule 1, 4 and 8.
